

Student name : _____ Block : _____

Project summary (in a short paragraph, tell me what you have in mind. Some detail is required!):

What parts of this project do you think might be challenging? (List at least two!)

What resources will you need to meet these challenges? (What software, information, help, etc. do you need? What do you need from your peers, your parents, your teachers...)

What parts of the project are you confident you can handle, and why?

Projects must: be Info Tech related, not duplicate another Goal or Signpost Assignment, require 4+ hours of work, be a challenge for the student, and be appropriate for school. Final decision about approval is up to Mrs. Cousar.
